

1. Place glass clip against the top of cage inside and slide the glass down into the cage against the clip. If it is beveled glass, the beveled edge should face out.

2. Be sure the glass goes inside the tabs at the bottom of the cage.

3. Using your finger, bend the glass clip down over the top edge of the glass.

4. Fold the tab down against surface of the glass and press in place. Repeat for each piece of glass.
