

Mailbox Restoration Instructions

Before

Mailboxes with such finishes as Copper, Swedish Silver, or Verde Green are hand painted finishes. Over time, exposure to the sun's UV rays can deteriorate the paint. In many cases, the paint can be restored using a restoration compound such as the one pictured below. It is recommended to clean the mailbox first before following the compound manufacturer's instructions. When complete, application of a UV resistant clear coat is recommended.

After

1634 Latrobe-Derry Road Loyahanna, PA 15661
